LDOTD, in conjunction with the Federal Highway Administration (FHWA), proposes to widen Juban Road from two lanes to four lanes. The project includes the construction of three roundabouts, frontage roads, shared-use paths, and traffic access management measures. An Environmental Assessment (EA) was prepared to study alternatives for the widening of Juban Road. Informational materials will be distributed and graphic displays will be available for viewing. A continuous presentation will be shown describing the project, alternatives studied, and impacts from the project, including wetlands and acquisition of right-of-way and relocation assistance. LDOTD representatives will be present to answer questions and discuss issues related to the project. Verbal and written comments on the project can be submitted at the meeting. Comments can also be mailed to the address shown below, postmarked by October 26, 2015.
